**Subject:** Microsoft Settlement

I would like it to be known that I fully support the settlement proposed by the Government and Microsoft. This decision will bring about stability and confidence to the technology sector and conclude a case that I strongly disagree with. Microsoft makes products that benefit the public. As a software developer who uses Internet Explorer in most of my projects, I've never understood the lawsuit. Why so much attention was directed at I.E. hurting consumers and competitors I will never know. No modern OS would be complete without a web browser. In addition, I.E. is a fantastic product that provides features and functionality that have always surpassed any other products on the market. Please accept this document into record as evidence of one consumer, developer and taxpayer who agrees with settlement hopes to see the case come to a close.

Sincerely,

John Warner Lewin
